About me

I'm passionate about data and am currently seeking an opportunity to apply my newfound skills in the real world. My goal is to contribute to data extraction and transform it into valuable insights, participate in predictive analytics projects, and enhance my abilities in information visualization and automation.

Education

TECSUP

Data Science and Big Data

Lima, Perú

PROBABILITY - THE SCIENCE OF UNCERTAINTY AND DATA

MicroMaster courses at Massachusetts Institute of Technology

ORACLE ONE

Backend Developer and Data Science

UBITS

AWS Cloud Studies

In progress

Experience

IMA GO

Data Analyst

Utilized Excel, IBM SPSS, and Python for statistical analysis. Created insightful visualizations with Excel and Power BI. Streamlined data collection using Power Automate. Conducted market research with qualitative and quantitative methods. Collaborated across teams to inform strategic decisions. Presented findings in compelling visual formats.

Lima, Perú (Hybrid)

August 2023 – March 2024

GRUPO LUCKY

Commercial Intelligence

I designed and developed customized dashboards to analyze sales data and market trends in Power BI and extracted data using SQL. As soft skills, I had the opportunity to present visualizations and analysis to clients, and I was involved in training the team on the use of the Xplora Movil tool.

Lima, Perú (Hybrid)

October 2022 – January 2023

ESTILOS S.R. L

Business Intelligence

I led a project on cohort analysis and customer churn prediction. I used Python and SQL Server to create predictive models, automate reports, and establish scheduled tasks to streamline report generation. I collaborated with a team of professionals in CRM and customer behavior analysis.

Arequipa, Perú (On-site)

May 2022 – August 2022

Leadership and Activities

Institute of Electrical and Electronics Engineers (IEEE)

Vice President of the Student Branch

Responsible for attracting teachers and professionals in the technology field to give informative talks on topics such as cybersecurity, video game development, and data science.

Lima, Perú

March 2021 – February 2022
